Conversation Controlling Lemon

Are you one of those people who opens their mouth only to discover you say the wrong thing? If this is you then the Conversation Controlling Lemon will change the way you socialize forever! When you feel a comment coming on pop it in your mouth and wait for the acidity to kick in. Not only does the lemon render you speechless by being inserted into your

Giant Grasshopper

If you are one of those anti-social people who like to sit in a corner and try not to catch anyone's eye, you probably know it doesn't always work. There will always be annoyingly cheery people who think you must be lonely and gatecrash your tranquility with mundane chit-chat. We breed our grasshoppers to an enormously threatening size, and train them to bite using the keyword, 'bite'. This is particularly useful when other pet owners aren't put off by its peculiarities and insist on chatting 'animal' with you. The grasshoppers are surprisingly easy to keep. They will keep your home free of bugs and vermin and need little else to eat. They are slightly jumpy about being taken out on a leash, but with practice, you will find a way to fall in step quite quickly. This particular breed has an exceptionally long lifespan and can be passed down through the generations. The grasshopper hasn't been cat, dog or child tested so we highly recommend not having any visit your home. Can be housed with other grasshoppers, an older quiet one could help to show it the ropes and understand the rules of the house.

Pet Experience Days

Give your beloved furry friend their dream birthday. Here at PED, we offer unrivaled entertainment at competitive prices. Starting with our best seller, the Balloon Ride. A large collection of helium-filled balloons will be attached with a harness to your dog, once we are confident we have enough power for takeoff then it's up, up and away they go. This adventure is heavily weather dependent as strong winds could prove hazardous as all dogs fly unaccompanied. Your dog will travel at 5 mph with the wind in its face, and I expect its tongue hanging out. Better than a trip in the car with the window open. Health & Safety is of paramount importance to us, should the dog, at any time, veer off course we will instantly start firing at the balloons one by one in order to facilitate their safe descent. This should not be any cause for concern as this is our official landing procedure at the end of the ride, and no fatalities have been recorded. You are strongly advised to wear wet weather clothing and carry an umbrella on the day, the dogs can become very excited on this ride and we have little control over where they might hover. Give your best friend the time of its life, book today as all early birds have an added bonus of choosing the colors of the balloons.

Pest Control Umbrella

We recently discovered, by accident, that vermin and all manner of pets and pests are attracted to umbrellas. Not to just any umbrellas though, they have to be long, pointy ones. It is very hard these days to get hold of an umbrella that isn't collapsible, these will not work as pest control. So, we decided to start designing and manufacturing our unique Pest Control Umbrella, the only genuine umbrella that will do the job. We have all copyright on these brollies and no other companies are allowed to remotely hint that their umbrellas can be used to rid yourself of those pesky pests. Never knowingly undersold we guarantee a price match on any other form of pest control, but not if you use a different umbrella for the job. Easy to use, just pop under your arm, pointy end facing behind you and watch the creatures follow your lead. By purchasing this highly effective product you will be well on your way to starting up your own pest control business, a little investment now will pay great dividends in the future for you and your family.
